SAVI W740 Headset

Lightweight & comfortable, long battery life

Rainbow features hosted phones to power your business. Hosted service is known industry-wide for its superior voice quality and mobility.

BENEFITS

Hosted PBX is truly the last phone system you'll ever need. It delivers best-in-class capabilities that are affordable for all. Hosted PBX keeps your up-front investment to a minimum, as you are not purchasing an expensive on-site phone system. It's completely scalable, meaning Hosted PBX grows with you as you grow your business. And since it's cloud-based, new capabilities are continually added and improved upon.

Hosted PBX delivers a slew of features to make your business more productive. It has all the features you'd expect, plus capabilities such as:

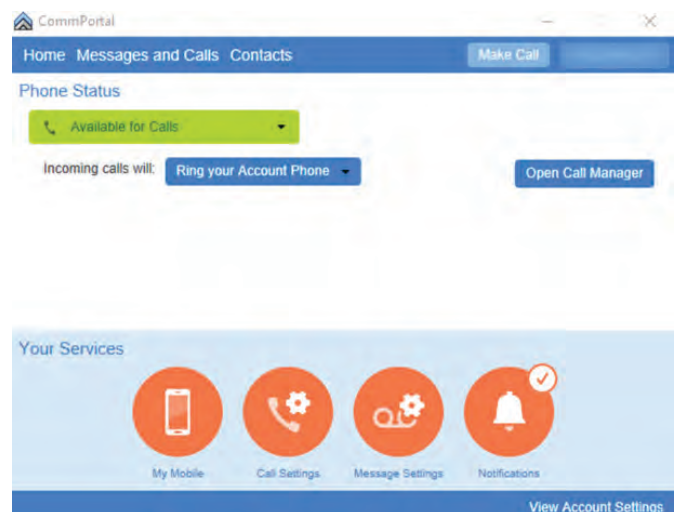

- Web portals for end-users and administrators
- Mobile and desktop apps enable features such as Instant Messaging, Call Jump, video calling, and click-to-dial within Outlook
- Powerful business-grade features such as Auto Attendant and music-on-hold
- Optional contact center capabilities for call queuing, monitoring, and reporting

With Hosted PBX, there are no hidden costs; you simply pay a flat rate per phone per month. As your business expands, you can add new users to your account.

Have a remote employee? The power of Hosted PBX enables you to put a phone anywhere with an internet connection and have it work seamlessly with the rest of your business.

WEB PORTALS MAKE ADMINISTRATION EASY

Hosted PBX provides a convenient web portal that makes it easy for users to set up and change features to suit their needs. Visual voicemail enables you to listen to messages or have them sent to email. Business Call Manager contains powerful call routing capabilities such as simultaneous ring, distinctive ring tones, and remote call forwarding. In addition to the user portals, Hosted PBX has a separate web portal for managing business-level features.

POWERFUL FEATURES

Rainbow has designed feature packages to support different user types and applications. Every phone can be customized to support your business needs.

MOBILITY AND UNIFIED COMMUNICATIONS

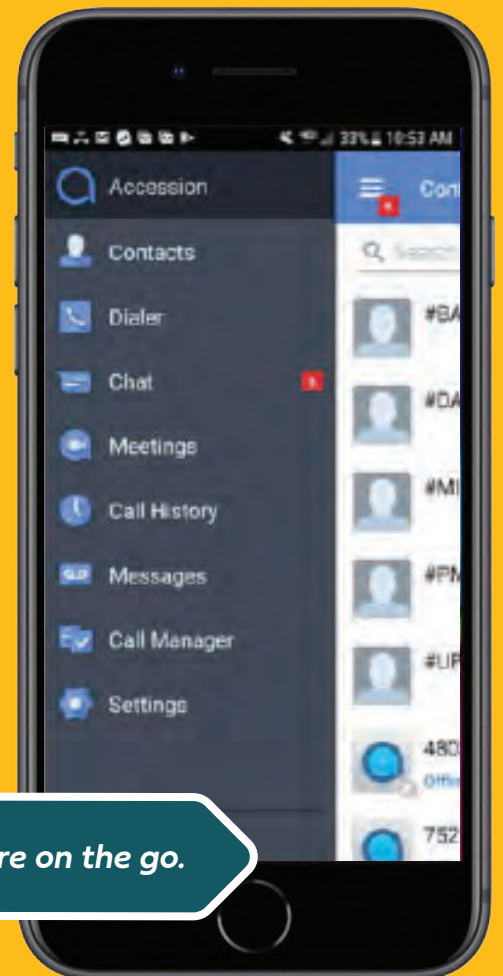

The Rainbow mobile app – Accession Communicator – is a great way to integrate a phone, tablet, or laptop into your communications landscape. Accession integrates your mobile device with desk phone functions and enables you to send and receive calls, instant messages, or video calls from any device connected to the Internet. Call Jump allows you to move a call to any other device silently and seamlessly.

Accession Mobile makes it easy to stay connected when you're on the go.

On a laptop or desktop computer, Accession is a complete unified communications tool. It enables you to integrate voice, video, instant messaging (IM), and email into a single platform. Powerful 'presence' capabilities allow you to see the real-time status of co-workers – available, offline, on the phone, or in a meeting. Accession integrates with Outlook so that calling and IM can be integrated into email. It also integrates with CRM applications like Salesforce or Sugar CRM and business productivity tools like Google apps and WebEx.

THE LAST PHONE SYSTEM YOU NEED TO BUY

With Hosted PBX, Rainbow Communications delivers a best-in-class phone system that allows you to buy only what you need. We take care of the details – phones, equipment, installation, training, and ongoing service – so you can focus on your business. Best of all, we're local and available around the clock to help solve any problems you might have.
